

A+ Certification

A+ Certification is a testing program sponsored by the Computing Technology Industry Association (CompTIA) that assesses basic computer service technology skills. Earning the A+ Certification means that the individual possesses the knowledge and skills that are essential for an entry-level computer service technician as defined by experts from companies across the industry. This certification program is backed by major hardware and software vendors, distributors, resellers, and computer publications. This program covers a broad range of computer technologies, but is not related to any vendor-specific products.

To become certified, an individual must pass tests on two parts – Core Hardware and Operating Systems Technologies. When both portions are passed, then the candidate receives the A+ Certification.

Intended Learning Audience: Individuals preparing to take the A+ Certification Exams

Course Format: Web delivery.

<u>Courses</u>	<u>ID #</u>	<u>Duration</u>
Operating Systems: Part One	0004200322	5 hours
Operating Systems: Part Two	0004200323	10 hours
Core Hardware: Part One	0004200325	10 hours
Core Hardware Part Two	0004200326	15 hours

Publisher: Element K

Founded in 1982, **Element K** is a pioneer in knowledge building with a history of helping businesses build knowledge through uniquely effective learning solutions. The company was started to train employees on the use of a new piece of office equipment – the computer. **Element K** is one of the pioneers in e-learning, and the company offers a wide range of online learning courses in information technology.
